DELETING CUSTOMIZATIONS ON P-CARD PAGES

Since the upgrade to OMNI 9.1, you may be experiencing issues with viewing chartfield information on the Account Distribution page in Reconcile Statement (Purchasing > Procurement Cards > Reconcile > Reconcile Statement). To restore the data, you must delete any previous customizations you may have created to the page view. You can customize the page again for your personal settings once this has been done and you are able to see the missing data.

Please follow the screenshots below to delete these customizations:
When you get to this page, you can print the screen so you have the previous customizations readily available to reset after you are able to see the missing data.
Please contact us with any questions.
